Editing your triv

If you decide to add some more questions or spot a typo in your questions you can go to your dashboard and edit your trivs. Click into Trivs I created (fig a) to access the edit option.

When you are in editing mode you will see that you have to find your video again in youtube, which is quite annoying!

However, you could use this opportunity and add another video into the same triv—perhaps a video that complements the first one or portrays a different aspect of the topic.

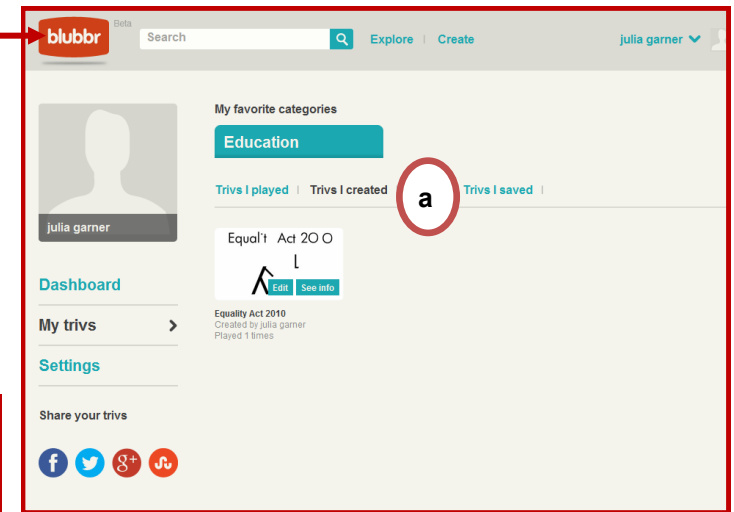

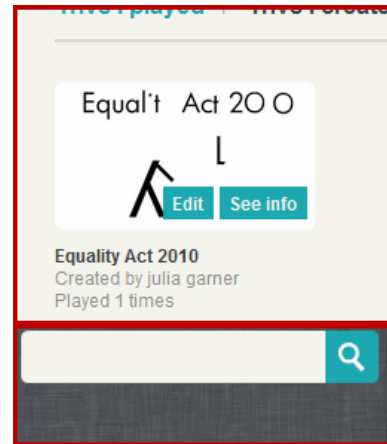

In this session you have learned how to:

- ♦ Use blubbr tv to open, edit, crop and add questions to a youtube video
- ♦ Embed your triv into your Moodle classroom

Other training sessions that you may find useful are:

- ♦ Picture manager and SPTV
- ♦ Using Movie maker to edit your own videos and presentations
